

REMEDIATION OF FORMER RHO REFINERY

ENI Refining & Marketing
Rho - Italy

**COMPLETION
DATE 2004**

PROJECT DESCRIPTION

Remediation of the soil and subsoil of former ENI refinery located across the Municipalities of Rho and Pero, close to Milan, preparatory to the erection of the new Fair of Milan.

The project included also the dismantling of the civil facilities still existing above ground, as well as the decommissioning of all the underground infrastructures (sewer, cable trays, foundations). In order to assure the respect of schedule and budget, the remediation works were conducted in conjunction with the erection works of the new Fair. Strong technical support to the Client in the relationships with Public Authorities has been assured by FWI.

FOSTER WHEELER ITALIANA SCOPE OF WORK
