

FIRE HEATERS

NEW VACUUM DISTILLATION HEATER

JSC MOZYR REFINERY
Mozyr - Republic of Belarus

**COMPLETION
DATE 2005**

PROJECT DESCRIPTION

The JSC Mozyr oil refinery in Belarus completed the installation of a new vacuum distillation heater. With a challenging schedule of 12 months from contract signature to start-up, the 350-ton fired heater fabricated module was moved onto existing foundations. The newly installed fired heater dramatically improved the process unit performance. Vacuum heater item P-101M – Review of key milestones:

Bid tender declaration & RFQ	14 August 2004
Contract signature	14 October 2004
Material delivery	June-September 2005
New heater erection	August-October 2005
Old heater dismantling	5-12 October 2005
New heater module moving	16-18 October 2005
New heater piping tie-ins	20-30 October 2005
New heater start-up	3 November 2005

FOSTER WHEELER ITALIANA SCOPE OF WORK

- Detailed engineering services and material/equipment supply on LSEM basis.
