

PHARMACEUTICALS

EXPANSION OF PLASMA FRACTIONS FACILITY

CONFIDENTIAL
Hungary

**COMPLETION
DATE 2011**

PROJECT DESCRIPTION

GMP upgrading and expansion of an existing plasma fractionation plant including the doubling of current plasma fractionation capacity, with installation of new process equipment. During the upgrading works, current fractionation operations will continue.

The project encompasses also the general site rearrangement, with construction of new warehouse / cold storage (raw materials and finished products), QC labs, offices and utilities.
