NEW BULK VACCINES PRODUCTION FACILITY

GSK BIOLOGICALS
Gödöllo - Hungary

**COMPLETION
DATE 2006**

PROJECT DESCRIPTION

The project consisted in the realisation of new bulk vaccine manufacturing facility on a green field site.
The project comprises production building plus site infrastructures. The size of the production building, that includes also the generation of all needed utilities, is 3,500 m² in footprint and 15,000 m² overall surface on 5 levels. The facility has been built on a green field site adjacent to an existing GSK Bio facility.
