HIGH CONTAINMENT PILOT PLANT

CILAG (JOHNSON & JOHNSON) Italy
Schaffhausen - Switzerland

**COMPLETION
DATE 2003**

PROJECT DESCRIPTION

The project foresees the realisation of a new pilot plant in an existing three-storey facility. The plant handles potent drugs and substances, and therefore the main topics was to set up a proper level of containment. An extensive use of isolation technology is foreseen. The project includes three different production compartments (one small scale and two medium scale), as well as a number of ancillary functions (solvent storage, equipment storage, weighing of chemicals, offices, preparative HPLC lab, etc.).
