

NEW BULK CHEMICAL API PLANT

SPIN (BRACCO GROUP)
Torviscosa - Italy

**COMPLETION
DATE 2001**

PROJECT DESCRIPTION

The project foresees the realisation of a new bulk chemical plant for production of contrast media within an existing building.
The project has foreseen the realisation of two production lines in two phases. The project encompasses the realisation of new utilities and solvent recovery systems for the plant and of a separate area for administration and QC labs. The plant complies with current GMP rules required by local and international authorities (such as FDA, EMEA, etc.).
