EXPANSION OF INJECTABLES FACILITY

SANOFI AVENTIS CHINOIN
Miskolc - Hungary

**COMPLETION
DATE 2006**

PROJECT DESCRIPTION

Extension of an existing plant to install a new production line for injectables in pre-filled syringes.

The project involves the reconversion of an existing warehouse into new production area organised on 4 levels, the realisation of a new warehouse and the general upgrading of existing utilities and infrastructures.

An expansion area has been left in the production level for a future second syringe line.

The overall surface of the new areas is of approx. 11.000 sq.m.

The construction has been performed with the site in operation without interruption
