NEW BULK PILOT PLANT

PHARMACIA & UPJOHN
Nerviano - Italy

**COMPLETION
DATE 1999**

PROJECT DESCRIPTION

Modification of an existing plant in order to allocate new equipment for chemical synthesis of bulk pharmaceutical products, within an existing R&D site.

The type and the size of the equipment is such to be used in the development phase.

Hastelloy, Glass lined and Glass lines are foreseen.

Revamping of emission treatment, storage tanks, and solvent recovery unit are also included.

The plant has been designed and constructed in accordance with GMP's valid for FDA and EEC countries
